

The DCS Netlink™

NEWSLINK

COMMUNICATOR

July / August / September 2006
Volume 13, Number 3

Do you need managed services?

DCS Netlink offers Managed Information Services, or MIS to our customers. As your MIS provider we become your IT department, or supplement your IT department with the skills and expertise of the entire team at DCS Netlink. MIS provided by DCS Netlink allows you to concentrate on running your business, while, based on a schedule you have decided upon (weekly, monthly, etc.) we take care of your IT infrastructure.

Just a few examples of MIS may include;

- Security planning, testing, and training
- Consultation, engineering, and implementation of IT solutions
- Data backup/restore solutions
- Site surveys and network documentation
- Antivirus program updates
- Scanning for Adware, malware, spyware
- Updates for Windows
- Updates for Productivity Suites such as Microsoft Office
- Computer Maintenance, including cleaning
- Server Maintenance
- Hardware Maintenance, upgrade, and/or installation
- Application Management and troubleshooting
- Disk Management

Whenever there is a mission critical failure of one of your IT components, the team will respond to such a "RED" condition within two hours time. In simple terms, if the failure affects the ability of your business to perform efficiently and effectively and on time, we'll be there until the solution is found.

In effect, the DCS Netlink team becomes your silent partner in success.

Call DCS Netlink today to become an MIS partner: 715-236-7424.

DCS Netlink now offers

SONICWALL TRAINING!

WS
WatchGuard™ 

We will be showcasing new WatchGuard models on July 21 at Turtleback Golf Dining & Conference Center from 8:00a.m. - 12:00p.m.
See page insert for details

Welcoming Our Newest Employee

Bob Carter, Infrastructure/ Project Coordinator

Accepting the opportunity to work with the folks at DCS Netlink is, for me, a dream come true, a chance to work and learn with the best.

I live with my wonderful wife, Tina, our four Shih tzu's (Sampson, Dottie, Yoshi, and

Hope), our two cats (Rachael and Buffy), one horse (Montana), so far, and whatever forest creatures decide to visit, in Winter, WI (about 59 miles to the north and east).

Besides computers, networking, and security, my interests include woodworking, organic gardening, botany, ecology, and environmental conservation. From time to time, I also dabble in computer programming, graphic design, and furniture design.

Come visit the DCS Netlink
Booth at the Barron County
Fair: July 19 - 23, 2006

DCS Netlink now offers SonicWall Training!

Great quality, high caliber, performance organizations, companies and even sports teams know how important it is to train their team members properly in order to accomplish their goals and to become the best in their business or sport. They also know that they need to train with the best and be trained by the best to stay on the leading edge of their industry to earn the highest revenue and build a winning team. The technology arena and especially the network and internet security arenas are no different. In fact, security challenges in technology today require the very highest caliber training to get it right! Training in security needs to be based on “hands on” practical knowledge and exercises to ensure your team is ready to face the technology and security challenges of today’s world.

If you are looking to train yourself and/or your staff to get the hands-on practical experience necessary to manage the unique and complex challenges that exist today in the networking security arena, then you need to consider training with DCS Netlink. Taking SonicWall security training with the DCS Netlink security team experts will ensure that you get practical and experience-driven training that is second to none. Many of our security team members are ex-military team members that bring a military security mentality and strategy to the commercial sector.

Make your team stronger and your networks more secure. Join our Virtual Internet Security Team Alliance (VISTA) and train with us. Call us to today to sign up for our SonicWall training at 715.236.7424.

SONICWALL

Join us at our first SonicWALL training class offered by DCS Netlink at our special introductory price of \$500! (Over 60% off regular retail price!)

Come to our Free SonicWALL Seminar on
August 18 from 8am – noon
at DCS Netlink. We will be showcasing
several great SonicWALL products!

Real Security requires Real Knowledge

CISSP COURSE instructed by Shon Harris,
author of the All-In-One CISSP Study Guide
September 17-22, 2006

Instructor Shon Harris

WHY PURSUE A CISSP CERTIFICATION?

The Certified Information Systems Security Professional (CISSP) is a very challenging certification and is considered the global standard for proving one's proficiency in several different security disciplines. It attests to a person's ability to meet a stringent set of criteria as defined by the (ISC)² and is a testament to that person's ability to comprehend a very broad spectrum of security concepts, principles and methodologies across many Information Systems functional areas.

Since the CISSP exam covers a broad range of security-related topics, it is a requirement for many technical, mid-management, and senior management personnel to obtain job placement or advancement.

The **Common Body of Knowledge (CBK)** was carefully constructed to cover all of the essential fundamental elements that are required for every part of security today. The CISSP exam covers the CBK, which is broken down into ten domains listed below.

Access Control Systems & Methodology	Operations Security
Applications & Systems Development	Physical Security
Business Continuity Planning	Security Architecture & Models
Cryptography	Security Management Practices
Law, Investigation & Ethics	Telecommunications, Network & Internet Security

WHAT'S INCLUDED IN YOUR INSTRUCTOR LEAD COURSE?

- 6 days filled with 2 domains of the CISSP covered each day by Shon Harris
- 1 final day review
- 1,200-page courseware book for the classroom
- Hundreds of review questions

WHEN AND WHERE IS THE COURSE GOING TO BE HELD?

- September 17-22, 2006
- Best Western Tysons Westpark, McLean, Virginia
- <http://book.bestwestern.com/bestwestern/productInfo.do?propertyCode=09103>

HOW DO I SIGN UP?

WGS WatchGuard®

Come to our seminar on July 21
at Turtleback Golf Dining & Conference Center
8:00a.m. - 12:00p.m. Cost: **Free!**

We are showcasing the newly-released Firebox X Edge models, the newly-released Firebox E series firewalls, the latest version of the management software called "Fireware", and the SSL-VPN appliances!

(Firebox® X 8510e-F)

Even before the recent network vulnerabilities became known, your Firebox® X had you protected. That's what true Zero Day protection is all about - sophisticated, built-in prevention that keeps you safe. Now you can boost that protection and get comprehensive Unified Threat Management with WatchGuard's powerful suite of Security Services.

Reality: Over 70% of e-mail contains spam.

Solution: SpamBlocker - the best service in the industry at stopping spam in real time.

Reality: Nearly 87% of computers have some form of spyware infestation.

Solution: Gateway AV/IPS - blocks not just spyware, but viruses, worms, trojans, and blended threats.

Reality: More than 70% of all successful network attacks exploit Web application vulnerabilities.

Solution: WebBlocker - lowers security risks and increases productivity by managing your users' Web surfing.

All services can be centrally managed using WatchGuard System Manager. One subscription per service provides protection for all users configured behind your Firebox X. For more information contact us today at 715-236-7424.

DCS Netlink also offers WatchGuard Classes!

information or to sign up!**

Some of our new websites!

Breastfeeding Avenue: www.breastfeedingavenue.com

Shop for quality breastfeeding related products, learn more about breastfeeding and read breastfeeding tips that are updated weekly .

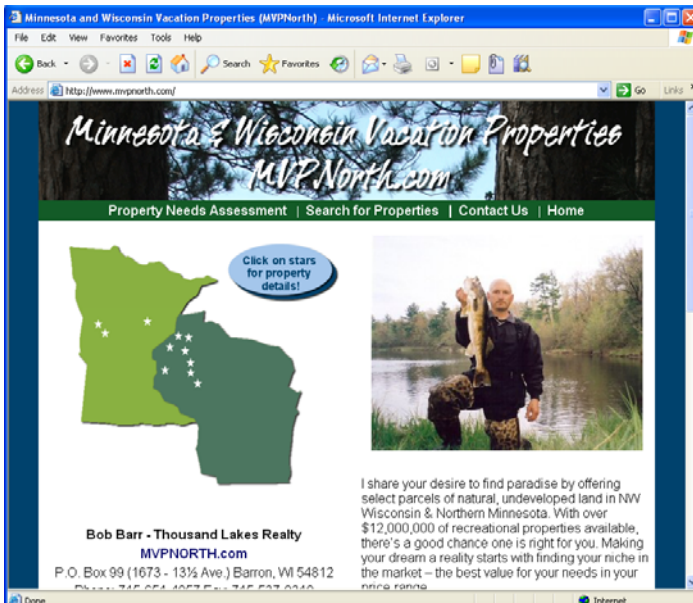

DCS designed this website and set up an online store which the client can easily update and their customers can make purchases right from the website using their credit card.

Gray Place Woodworking: www.gpwoodworking.com

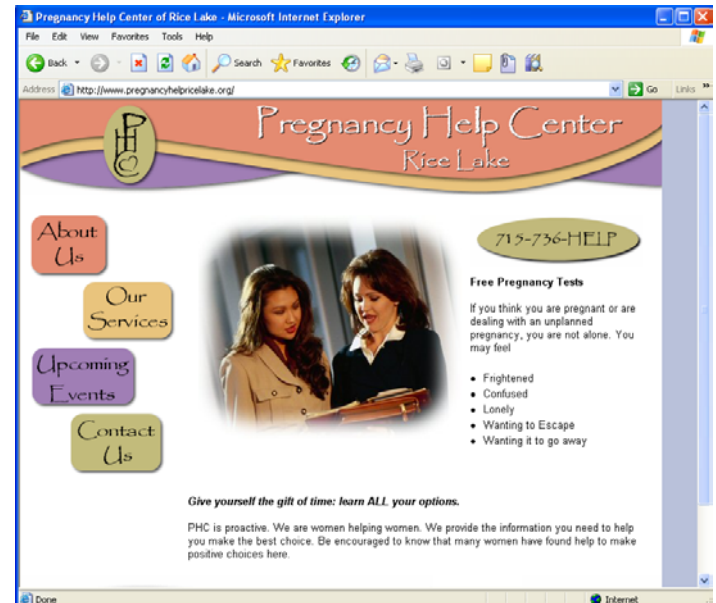

Gray Place Woodworking can build unique hand-crafted wood furniture to enhance your home or office.

DCS Netlink designed this website with the client's input. The website features information on the company and an online gallery of just some of Gray Place Woodworking's unique products.

Minnesota & Wisconsin Vacation Properties: www.mvprnorth.com

Real estate agent Bob Barr offers select parcels of natural, undeveloped land in NW Wisconsin & Northern Minnesota. DCS Netlink designed this website and created a map so customers can find properties in the areas they are interested in. DCS also created a maintenance area in which the client can easily add or remove properties.

Pregnancy Help Center: www.pregnancyhelpricelake.org

Pregnancy Help Center Rice Lake provides the information you need to help you make the best choice if you have an unplanned pregnancy.

DCS Netlink designed this site. Once the basic design was in place, the client was given access to the site and they now can update the site themselves using FrontPage.

www.dcsnetlink.com

School will be back in session soon!
Does your child have the technology he/she needs to succeed?

Does your child have access to a computer at home to type up his/her papers or do research on the internet? Kids today need to have the right technology available to be successful in school. Stop in at DCS Netlink and we can configure an IBM computer specified to your needs.

BACK TO SCHOOL SPECIAL

\$50 OFF

IBM Computers

Offer expires September 30, 2006. Limit one per customer.
